PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer with hands-on experience building scalable web applications, AI-powered platforms, and fine-tuned language models. Proficient across the entire development lifecycle — from designing intuitive React/Next.js frontends to architecting robust Node.js backends integrated with cloud databases. Passionate about leveraging generative AI (RAG, PyTorch, Ollama) to solve real-world problems.

TECHNICAL SKILLS

Frontend	React.js, Next.js, HTML5, CSS3
Backend	Node.js, Express.js, TypeScript, JavaScript (ES6+)
Databases	PostgreSQL, MySQL, Firebase, AWS (S3 / RDS)
AI / ML	Python, PyTorch, LLM Fine-tuning, RAG, Vector Databases, Ollama
Tools	Prisma ORM, Git, REST APIs, Razorpay, Vercel

PROJECTS

Wildmind AI

Next.js · Node.js · PostgreSQL · Firebase · Razorpay

<https://onstaging.wildmindai.com/>

- All-in-one generative AI platform supporting image generation & editing, image-to-image, text-to-video, image-to-video, music generation, SFX, voice cloning, text-to-speech, and AI workflow automation.
- Integrated multiple third-party AI APIs and built a unified subscription & billing system using Razorpay.
- Designed a multi-tenant architecture with Firebase authentication and PostgreSQL for persistent user data.

Node-Based Canvas Editor

Next.js · Node.js · PostgreSQL · Prisma · Firebase

<https://onstaging.wildmindai.com/>

- Built an interactive node-canvas enabling users to create, arrange, and generate AI media (images, video, music) via a drag-and-drop graph editor.
- Implemented a plugin architecture supporting upscaling, vectorization, background removal, and more.
- Managed complex cross-node state using Prisma and PostgreSQL with real-time sync via Firebase.

Vachnamrut AI Assistant

Python · PyTorch · RAG · Vector Database · Next.js

Deployed locally for privacy-preserving on-device querying

- Built a fine-tuned AI assistant that answers questions grounded in the Vachnamrut scripture, preventing hallucinations via Retrieval-Augmented Generation (RAG).
- Segmented the entire scripture page-by-page into a vector database; deployed inference locally using Ollama.

Kofeko — AI HR Management Platform

Next.js · Node.js · PostgreSQL · AWS · Prisma · Razorpay

<https://kofeko.com/>

- Developed an AI-powered hiring tool that parses candidate resumes and generates structured evaluation reports for HR teams.

- Built a dynamic scoring engine that adjusts candidate scores in real time based on HR and technical interview feedback, improving shortlisting efficiency.
- Integrated AWS S3 for document storage and Razorpay for subscription payment processing.

Unoloft — PG Management Software

Next.js · Node.js · PostgreSQL

Ongoing

- Building a full-featured PG management dashboard enabling owners to manage tenants, rooms, occupancy, and rent collection from a single platform.
- Developed automated rent reminders, tenant onboarding flows, and real-time occupancy tracking to reduce manual overhead.
- Architected multi-property support, allowing owners to manage multiple PG locations under a single account.

EDUCATION

B.Tech in Computer Science

May 2021 – June 2025

U.V. Patel College of Engineering, Kherva, Mehsana

CGPA: 7.80

HSC (PCM)

March 2021

Silver Bells English Medium School (CBSE), Palanpur

Percentage: 74.65%

SSC

March 2019

Silver Bells English Medium School (CBSE), Palanpur

Percentage: 80.16%

ORGANIZATIONS & ACTIVITIES

- NSS Volunteer — Community service and social outreach initiatives.
- Jooy Club — Active contributor in management, leadership, and networking events.
- Youth for Welfare NGO — Management Department — Supported planning and execution of welfare programs.
